Network Registration

Computers connected to the network via ethernet or BrynMawrGuest wireless must be registered before they can be used on the Bryn Mawr College network. Computers connected to eduroam wireless (recommended for all Tri-College community members) no longer need to register their computers via the Network Registration page. This sheet offers guidance for successfully completing Network Registration when you first connect on campus.

Wireless Only:
On the Network Registration page, you can choose to Join Bryn Mawr College Secure Wireless (for all users who have a Tri-College email address) or proceed to register on the guest wireless by filling out the registration form per the instructions below.

Note: Visitors on campus (those without a Tri-College username and password) will require a PIN code to complete the network registration. If you are a guest at Wyndham, you can receive a PIN code from the front desk. Otherwise, you can receive a PIN by calling the Help Desk at 610-526-7440 or by visiting the desk on the first floor of Canaday Library.

Registration:
If you are registering your computer via an Ethernet connection, you will need to follow these steps to ensure your registration is successful.

1. Select your role with the college. If you are faculty, staff, student or an affiliate of the College with a Bryn Mawr username and password, select Bryn Mawr Community Member. If you are faculty, staff, or a student at Haverford or Swarthmore with a Haverford or Swarthmore username and password, select TriCollege Community Member. If you are a visitor to the campus, select Visitor to the Campus.

2. Fill out the rest of the form as need. If you are registering a College-owned computer, you will need to enter its Asset Tag number, which is found on the green sticker on the computer itself. If you are a student, you will need to enter your expected graduation year. Some fields may not appear until you have entered the field before them. For example, a space for a computer’s asset tag number will not appear until you have selected Bryn Mawr College as an answer to “Who owns the computer being registered?” If you find a required space is not appearing, make sure you are using the latest version of FireFox and have recently cleared your cache.

3. Read through the Acceptable Use Policy, stated below the last question on the Network Registration page. By clicking Register at the bottom of the page, you are agreeing to abide by this policy. When you are done reading, click Register.

4. After you have finished the registration form and clicked Register, you will be brought to a page which tells you whether or not your registration was successful. Once you have successfully registered, you will need to shut down your computer and leave it off for 3-5 minutes. When you turn your computer back on again, the registration will be complete.
