Mapping Your Network Drives—Windows 10

Mapping your network drives on your computer allows you to access files stored on your H: drive or any departmental files stored on the S: drive. The instructions below will show you how to connect to your network drives while you are on campus and connected to eduroam or the Ethernet. If you are not on campus, you will first need to connect via VPN before following the instructions below. Instructions for connecting to the VPN are located here: http://techdocsblogs.brynmawr.edu/1019

1. From the Start menu, search for File Explorer and open the program
2. Click This PC located in the list on the left
3. Click Computer at the top of the window then Map Network Drive.
5. In the Folder field, enter the path of the directory you want:

<table>
<thead>
<tr>
<th>Drive</th>
<th>Folder</th>
</tr>
</thead>
<tbody>
<tr>
<td>H: (Home)</td>
<td>\home.brynmawr.edu\home\username</td>
</tr>
<tr>
<td>S: (Dept)</td>
<td>\storage.brynmawr.edu\storage</td>
</tr>
</tbody>
</table>

6. Uncheck the Reconnect at sign-in box.
7. Check the box Connect using different credentials.
8. Click Finish. When prompted, enter your username and your College password. If you choose to check Remember my credentials, please note that the saved password will no longer be valid once you change your password.
9. Click OK. In a few seconds, your drive will open in a new window.
